this book addresses the very many considerations persons face in handling their income savings investing borrowing protecting against risks and tax planning somewhat surprisingly our educational system at the high school level and beyond rarely addresses this myriad of issues both problems and opportunities that can be categorized as personal finances our schools lecture ceaselessly about the challenges of drugs sex alcohol smoking social media and wellness and appropriately so since young people are exposed to endless opportunities to make poor and harmful decisions regarding each of those matters but so also are adults at all ages teenagers to senior citizens confronted by a host of challenges and opportunities as to how to manage their personal finances from before they receive their first paychecks and continuing on through retirement and death as we proceed through high school college and even graduate school we may take courses in accounting finance economics and taxation all of which offer tidbits of advice on handling our personal finances but none are comprehensive in addressing personal finance this book seeks to fill that void
